

About Us

Founded in 1978, Canamex Communications has a long history of developing products that have contributed to the advancement of the telecommunications industry and to the general benefit of our society.

Today, millions of people enjoy two-way text messaging for chatting with family and friends, and even to communicate messages related to business. Devoted smartphone users consider the pager a "**thing of the past**"; an "**obsolete technology**". They wonder who in their right mind would buy pagers when we all carry smartphones for messaging.

The use of the smartphone for texting, has forced us to **view the pager under a different light**. We, at Canamex Communications, do not think that the pager can be classified as "obsolete technology", because the pager is a very reliable "**radio receiver**", proven to be practical and economical during decades of worldwide use. Instead, we think that the pager has been moved to a different "**application level**" within the corporate wireless industry, particularly for in-house alert of critical messages in Hospitals and Factories. **When we saw this shift happening, we rushed to develop a PageRouter solution to combine the use of pagers and smartphones, to fulfill particular applications at reasonable operational budgets.**

We optimize wireless messaging needs with costs

Canamex Communications has developed the "ideal" solution if you are a Hospital or a Factory who needs to guarantee delivery of wireless critical messages to staff, in seconds.

We have developed the **PageRouter** and **TeraMessage** technologies that allow you to find the balance between operation costs and the use of traditional and new wireless message delivery technologies.

We offer simple choices where you can **combine the use of computers, in-house pagers and smartphones**, all integrated into one Message Management solution:

- ❖ If the cost of using smartphones for everyone has resulted to be too high and you want to return to in-house paging, replace your old in-house paging equipment with a **PageRouter Lite** or a **PageRouter Pro** Message Management solution.
- ❖ If you want to optimize the use of computers, in-house pagers and smartphones, a **PageRouter Enterprise** with **TeraMessage** is the ideal solution.

Contact us and let us know what your requirements are. We will do our best to offer you **an economical, practical and affordable solution**.

With over 35 years of experience, customers can depend on us to provide reliable products, professional services, and full support.

We look forward to serving you!

Services

We start by configuring a PageRouter solution based on your specific needs, at no charge.

We will send a proposal for your approval, with the best possible price.

Once approved, we will take care of software installation and guide you to interconnect equipment, if necessary. You will receive on-line effective training to start sending messages immediately.

It will not take long for you to start sending messages to users with pagers, computers, smartphones and tablets in your company.

We work in partnership with our customers, providing each with a customized service approach, and we are always looking at new and innovative ways to meet the needs of our customers.

The services we offer embody the following values:

Expertise

We understand the specific needs of your Hospital, factory, or industry. Our team of Engineers and Developers know our business very well, and can be relied on to help you choose the best solution.

Quality

We will always strive to provide our Hospital paging and factory paging customers, with the best possible PageRouter paging solutions, products, support and service. This important philosophy has been the foundation of our success for over 30 years!

Efficiency

We understand that your time is valuable, so we have the qualified personnel and resources to attend to your paging requirements, as quickly as possible.

At Canamex Communications Corporation, we have the experience and expertise to help you succeed. For more information on the services we can provide, please [contact us](#).

Products

A Reliable product line for critical messaging

We have a comprehensive line of **products for all your mobile messaging and paging requirements**, no matter if you are a Government, a Hospital, a Factory, a Refinery, a Mine, or any other type of business that needs to securely deliver CRITICAL messages **WITHIN SECONDS!**

[Chat with us LIVE](#)

Consider implementing a **TeraMessage Private Network** to protect mobile messages traveling on the Internet or through cellular networks, sent using computers and smartphones. If your Hospital has been using paging, think of a **PageRouter Paging Solution** to replace obsolete in-house paging equipment, including encoders and transmitters.

Solutions

PAGING CRITICAL MESSAGES TO IN-HOUSE PAGERS AND SMARTPHONES

No matter if you are a Hospital, a Nursing Home, a Factory, a Refinery, a Hotel, a Mine, or any other type of business; you know that CRITICALmessages require immediate delivery to staff.
